IDENTIFIERS	Colorado

ABSTRACT

This basic vocational related skills assessment module in distributive education is one of sixteen modules designed to help teachers assess and identify some of the areas in which special needs students may encounter learning difficulties. The materials in the module allow for informal assessment in three basic areas: academic skills, motor skills, and vocational interest and awareness. The basic skills assessment includes reading skills, listening skills, using a book to locate information, and mathematics. The reading section offers materials written at two different reading levels: the first paragraph is easy (4-8), while the second paragraph is more difficult (9-12). The motor skills are assessed through teacher observation and recording on a matrices skills checklist. The third area, vocational interest and awareness, is assessed through a vocational awareness questionnaire completed by students. (LRA)

DESIGN AND IMPLEMENTATION OF AN ASSESSMENT MODEL FOR STUDENTS ENTERING VOCATIONAL EDUCATION PROGRAMS IN THE STATE OF COLORADO

Each learner should be considered as unique. All students have unique characteristics which are considered by alert teachers in their efforts to foster more effective learning. This is especially true in vocational programs where our opportunities to know each learner are greater than in some other classroom situations.

Douglas Towne
Sydney Wallace

The purpose of this project was to develop materials that could be utilized for informal assessment of students in vocational programs. The materials were then developed into a series of sixteen modules representing the seven service areas of vocational education. These modules will enable teachers to assess and identify some of the areas in which special needs students may encounter learning difficulties.

This project and the resulting modules are based on the assumption that one of the ways that vocational education can provide training "appropriate to the needs and progress of each ... individual," is to assess the needs of each individual. Another assumption is that "modifying" a vocational program may be done in many ways but cannot be done effectively until assessment of student needs has been completed. The modules will provide information that will enable vocational teachers to modify their materials or lessons based on the results of the assessment information.

Information which you obtain from the assessment may be used in the following ways:

grouping of students with similar instructional needs
placement of students in programs
modification of instructional materials
writing goals and objectives for the student
obtaining remedial help
as a model to devise your own materials
writing contracts for behavioral change
giving specific information to supplemental services or support staff for assisstance

Identification of learning problems clarifies the various level of abilities and the learning styles of students. This necessitates individualizing vocational programs and instruction.

The modules include basic academic skill assessment, motor skill assessment, and interest assessment.

The following vocational areas are included in the modules:

1) *Welding*
2) *Sheet Metal*
3) *Agriculture*
4) *Graphic Arts*
5) *Woodworking*
6) *Automotive*
7) *Autobody*
8) *Drafting*
9) *Health Occupations*
10) *World of Work*
11) *Food Preparation*
12) *Child Care*
13) *Distributive Education*
14) *Electricity*
15) *Horticulture*
16) *Business and Office Occupations*

The assessment of student abilities are important for success in the vocational classroom. The basic skills assessment includes Reading Skills, Listening Skills, Using a book to locate information, and Mathematics. The mathematics section covers many of the basic operations and applications of math that is needed in vocational classes.

The reading section offers paragraphs written at two different reading levels; the first paragraph being easy (4-8), the second paragraph more difficult (9-12). Those students who have trouble with both paragraphs will find it difficult to learn through reading.

As a result of the field testing comments, there are two areas which are only included in the module entitled, World of Work. These two areas are "Following Directions" and "Safety Warnings Quiz". They were judged too "easy" for inclusion in all modules. This module was written specifically for students in disadvantaged and handicapped programs.

Materials are color coded for ease of usage and efficiency.

MATRICES
SKILLS CHECK LISTS

DIRECTIONS TO THE TEACHER:

* This section is designed to assess capabilities that are not easily quantifiable. Therefore, you will use these as observation instruments.
* More than anything else, these are to be used as diagnostic tools to help establish goals and objectives.
* Using the matrices, observe the student over a period of several weeks in several different situations.
* There are many reasons for poor or below average levels of performance. These may include environmental influences and health, i.e., stress, nutrition, physical limitations. The matrices are merely a guide to reflect how well a student is doing in your area.

DIRECTIONS: Please check the level each student is at according to the following scale.

1. poor
2. below average
3. average
4. good
5. very good
6. n/a

STUDENT MATRIX SKILLS CHECK LIST															
DAILY LIVING COMPETENCIES:															
Can give personal information															
Money concepts															
Transportation abilities															
Job seeking skills															
Completes work															
Understands directional terms															
Understands safety rules															
Demonstrates cooperation with others															
Punctuality															
Attendance															

DIRECTIONS: Please check the level each student is at according to the following scale.

1. poor
2. below average
3. average
4. good
5. very good
6. n/a

Perform Manipulative Tasks																	
Move Around Objects																	
Use Large Tools																	
Small Motor-eye-hand Coordination																	
Two Hand Coordination																	
Use Small Tools																	
Finger Dexterity																	
Steady Work Pace																	
Heavy Lifting																	

READING SKILLS

DIRECTIONS TO THE TEACHER:

This instrument is designed to assess how well the student understands written materials. The skills are broken into vocabulary, (Question 1-5), main ideas, (Question 6), details or facts, (Question 7), and inference or logical deduction, (Question 8).

1. Have students read each paragraph and then answer the questions on the following page. The students may refer to the original paragraph while completing the questions. (Time: approximately 15 minutes).
2. Collect all sheets.
3. Correct worksheets.

   Vocabulary

   a. For each vocabulary word listed (Questions 1-5), the student should leave a definition or synonym that shows an understanding of the word as it is used in the sentence. Score vocabulary questions as one (1) point each. Five (5) is a perfect score; zero (0) means none are correct.

   Main Idea

   b. In Question Six (6) you will assign a score of 1-5. The score should be based on how completely the student comprehends the paragraph.
      1) little knowledge or comprehension
      2) some grasp of paragraph
      3) fair idea of paragraph's content
      4) good idea of paragraph
      5) description which tells what the whole paragraph is about

   Details

   c. In Question Seven (7) a full score, five (5) points, should be based on whether the student puts down the two important facts.
      1) any one fact in the paragraph
      2) any two facts in the paragraph
      3) one fact that answers the statement well
      4) one fact that answers the statement well and any one that is in the paragraph
      5) Two facts that answer the statement well

Inference

d. In Question Eight (8) you are looking for an understanding that goes beyond what is in the paragraph.

1) any attempt to answer

2) any answer that even addresses the question

3) some idea of an extension of the basic knowledge

4) 5) a good answer which shows an understanding of the implications of the question.

EXAMPLE: A few words which describe what a good title for the paragraph is about would receive a score of four (4).

4. Total the scores (1-8), for each paragraph.

EXAMPLE:

	Paragraph 1		Paragraph 2		TOTAL
Vocabulary	_____	+	_____	=	_____
Main Idea	_____	+	_____	=	_____
Details	_____	+	_____	=	_____
Inference	_____	+	_____	=	_____

5. Enter the score from each area and the total on the class scoring sheet.

6. Paragraph one was chosen for student who have lower reading levels. Paragraph two was chosen for students who read at the high school level.

DISTRIBUTIVE EDUCATION
READING SKILLS - I

READ THIS PARAGRAPH:

When the dresses arrive in the store, the BUYER DETERMINES the selling price. The dresses of course will be sold for a higher amount than the store has paid for them. The difference between the cost of an item to the store and its selling price is called MARKUP. Markups must be high enough, on an average, so that all markups added together can pay the EXPENSES of running the store. The salaries of all the people who work there and the cost of display fixtures, light bills, and taxes are all store expenses that must be paid. Then there must be some left over for the store to make a large enough PROFIT to stay in business.

ANSWER THE QUESTIONS ON THE NEXT PAGE

_____ Careers In Focus, "Exploring Marketing Occupations;" by Smith, Vorndran, and Winn; 1976.

READING SKILLS - I

DIRECTIONS TO STUDENT:
Please tell what the following words mean as they are used in the previous paragraph.

1. BUYER _____

_____

2. DETERMINES _____

_____

3. MARKUP _____

_____

4. EXPENSES _____

_____

5. PROFIT _____

_____

VOCABULARY _____
(0-5)

6. What is this paragraph about? _____

_____

_____

MAIN IDEA _____
(1-5)

7. Name two store expenses:

1) _____

2) _____

DETAILS _____
(1-5)

8. Why is a buyer's job important? _____

_____

_____

INFERENCE _____
(1-5)

TOTAL SCORE

DISTRIBUTIVE EDUCATION
READING SKILLS - II

READ THIS PARAGRAPH:

Because product movement can REACT so dramatically to any change in pricing, it is important that a careful SHELF-WATCH be maintained during transitional periods of price ADJUSTMENT. The negative of what can happen in these situations is illustrated by a number of super markets which converted to DISCOUNT pricing and suddenly became as famous for OUT-OF-STOCKS as for their lower-price policy. Even switches from single to multiple-unit pricing and such price influences as cents-off labels also can be significant.

ANSWER QUESTIONS ON THE NEXT PAGE

Lee W. Dyer, Merchandising in Action, Progressive Grocer Magazine, New York, NY, 1972.

DIRECTIONS TO STUDENT:
Please tell what the following words mean as they are used in the previous paragraph:

1. REACT_____

2. SHELF-WATCH_____

3. ADJUSTMENT_____

4. DISCOUNT_____

5. OUT-OF-STOCKS_____

VOCABULARY_____
(0-5)

6. What is this paragraph about?_____

MAIN IDEA_____
(1-5)

7. What are two reasons for changes in number of items sold?_____

DETAILS_____
(1-5)

8. Why is it important to "shelf-watch"?_____

INFERENCE_____
(1-5)

TOTAL SCORE_____

LISTENING SKILLS

DIRECTIONS TO THE TEACHER:

This test is designed to indicate how well your students use their auditory skills. They will be listening to a passage that is read two times. Then they will fill in the missing words on the answer sheet.

In order to utilize the Listening Skills Unit, the listening skills paragraph needs to be taped or read to the students by you.

Please read the directions on the student sheets to the class. The students may write on their answer sheets at any time during the two readings. The students should be asked to read the test sheet before listening to the tape.

GRADING:

The number correct is the total number of correct words filled in the blanks. Please accept reasonable substitutes for the words. Overlook poor spelling.

DISTRIBUTIVE EDUCATION (MARKETING)
LISTENING SKILLS

Scheduling Sales Representatives

In order to find time to see sales representatives who have new merchandise to present or who are other than route personnel, it is wise for the merchant to set aside regular days and hours. Otherwise, the merchant may be constantly interrupted in the performance of other duties. Exceptions may have to be made for out-of-town salespeople who have travel schedules to meet. Merchants should request out-of-town salespeople to make advance appointments by phone or letter.

The retailer must be selective in granting valuable time to visiting salespeople. If the small retailer gives these people all the time they want, several work hours will be lost each week. The retailer should screen those salespeople representing merchandise areas in which the retailer has no interest. Repeat calls should be reserved only for those sales representatives who represent appropriate merchandise lines, who have new information to provide, and who are truly interested in the retailer's business.

PARAGRAPH TO BE READ OR TAPED

DISTRIBUTIVE EDUCATION
LISTENING SKILLS

ANSWERS

Scheduling Sales Representatives:

1. Set regular days and hours to see sales representatives.
2. Otherwise the merchant may be constantly interrupted.
3. Exceptions may be made for out-of-town salespeople.
4. However, out-of-town salespeople should make advance appointments by phone or letter.
5. The retailer's time is valuable.
6. If the small retailer gives these people a lot of time, several work hours will be lost each week.
7. The retailer should screen the salespeople.
8. Repeat calls should be reserved for salespeople representing appropriate merchandise areas, who have new information to offer and who are really interested in the retailer's business.

LISTENING SKILLS

DIRECTIONS TO STUDENT:

You will hear a passage read from the book just mentioned. The passage will be read once quickly and then again slowly.
Listen carefully to the passage each time it is read. As you listen to the passage being read fill in the blanks. You will fill in the facts that you hear on your answer sheet.

READ YOUR SHEET THROUGH BEFORE LISTENING TO THE TAPE.

LISTENING SKILLS - Student Worksheet

Scheduling Sales Representatives:

1. Set regular _____ and _____ to see sales representatives.
2. Otherwise the merchant may be constantly _____.
3. Exceptions may be made for _____ salespeople.
4. However, out-of-town salespeople should make _____ appointments by phone or _____.
5. The retailer's time is _____.
6. If the _____ retailer gives these people a lot of time, several work _____ will be lost each week.
7. The retailer should _____ the salespeople.
8. Repeat calls should be _____ for salespeople representing appropriate merchandise areas, who have new _____ to offer and who are really _____ in the retailer's business.

PARTS OF A BOOK

DIRECTIONS TO THE TEACHER:

Being able to locate information in a book is an important skill in most vocational areas. This test is designed to indicate the student's information locating ability in using a TABLE OF CONTENTS and an INDEX.

The student will use a table of contents and an index from your vocational area to answer five questions for each of the two areas. CAUTION students that the Table of Contents and/or Index may have more than one page. Ask students to check all pages before writing down their answers.

SCORING:

Correct the two parts and enter the total score on the class-scoring sheet.

Example:

Score - Table of Contents . . . . . _____

Score - Index . . . . . + _____

(0-10) _____

DISTRIBUTIVE EDUCATION
PARTS OF A BOOK

ANSWERS:

Table of Contents

1. page(s) 313
2. page(s) 254
3. page(s) 345
4. page(s) 329
5. page(s) 339

Index

1. page(s) 256
2. page(s) 318-323
3. page(s) 525
4. page(s) 483
5. page(s) 28

PARTS OF A BOOK

DIRECTIONS TO THE STUDENT:

There will be two parts to this section.

Using a Table of Contents
Using an Index

*Answer the Table of Contents questions by using the Table of Contents that follows.

*Answer the Index questions by using the Index that follows.

MATHEMATICS TEST

DIRECTIONS TO THE TEACHER:

This test is designed to assess skill areas that might be needed in a vocational class.

The skills cross vocational areas.

The first ten questions comprise a basic skills assessment. The rest of the test uses various kinds of skills in diverse mathematical areas.

A student should not spend too much time on any one problem. He/she should be given extra time if necessary.

1. Allow one hour for students to complete this test.
2. Score the answers on the students' test.
3. Subtract the number missed from forty-two (42).
4. Enter the score on the class scoring sheet.

It is easy to tell which areas a student is weak in by referring to the test itself.

This is important when there are only a few wrong.

ANSWERS

5c. Subtract: 15.63 from 18.5

d. Subtract:
3 meters 3.0 CM
- 2 meters 55 CM

5c. _____

5d. _____

6a. $\begin{array}{r} 12 \\ \times\ 3 \\ \hline \end{array}$

b. $\begin{array}{r} 429 \\ \times 306 \\ \hline \end{array}$

6a. _____

6b. _____

7a. $5\overline{)25}$

b. $26\overline{)2782}$

7a. _____

7b. _____

8a. $7 \times 2\frac{1}{2}$

b. $1\ 3/4 \times 2\frac{1}{4}$

8a. _____

8b. _____

9a. $6\frac{1}{4} \div \frac{1}{4}$

b. $7\ 5/8 \div 1\ 7/8$

9a. _____

9b. _____

10a. $\begin{array}{r} .06 \\ \times .05 \\ \hline \end{array}$

b. $\begin{array}{r} 10.2 \\ \times\ .37 \\ \hline \end{array}$

10a. _____

10b. _____

10c. _____

10d. _____

c. $8\overline{)64.8}$

d. $2.50\overline{)17.5}$
